

# ART & HORSES

A Special Program Presenting a Unique Opportunity  
for Personal Growth and Learning

A Collaborative Program of  
**ArtQuest School of Art & Design**  
**GroundTies Equine Assisted Counseling**

*This unique program* combines art instruction specifically about horses with actual hands-on horse care. Students may expect a powerful and enjoyable experience that will motivate and inspire for years to come.

Students will participate in a charcoal “draw along,” learning simple, but effective techniques for drawing the horse which will help them intuit equine anatomy. They will further celebrate the beauty of the horse by creating crafts from real horseshoes such as dreamcatchers, and picture frames. The self-esteem derived from a job well done could only be surpassed by the fun from trying something so different.

The field experience with horses includes grooming, safety issues, proper leading and handling. Playing goal-oriented games with the horse allows participants to draw parallels between the challenges presented by these activities and real life. Every horse is different, and there are trust and communication issues to deal with, just as there are with humans. Patience is required, but the rewards are palpable at any level.

*Specialized sessions may be scheduled upon request. Located at our private facility in Ormond Beach*
